Service & Repair

RENOLD | Gears

Global Industrial Gearbox Service and Repair

Renold is a global engineering group with over 135 years of experience in the design and manufacture of high-quality power transmission products and application-specific solutions.

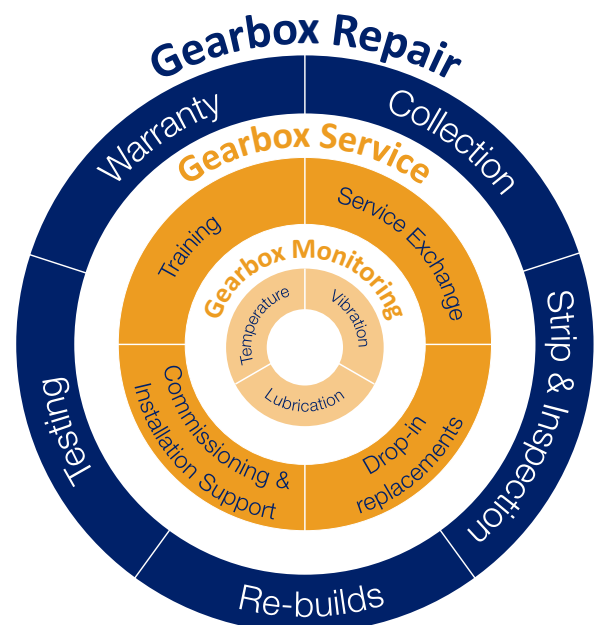

Application knowledge and engineering expertise, together with global manufacturing and service, ensures that Renold is your ideal partner – whatever your industry need. It is this unique industry experience gained in demanding global environments that makes the vital difference.

Our skilled engineers work closely with customers to provide a wide range of solutions for critical, real-life applications. Solutions that are proven to stand the test of time – that is why we believe in the principle: ‘Engineering for Life’.

Service Solutions

Renold Gears offers a complete repair service. Our expertise is based on over 135 years of gearbox design and manufacture and is supported by our dedicated Service Team.

Our Rapid Response Service ensures minimum disruption and downtime.

Gearbox Repairs

Repairs

We offer 2 levels of repair:

- 1. Standard Repair** – Replacement of bearings and seals only.
- 2. Enhanced Repair** – Replacement of gearing, bearings and seals and any other identified parts.

It also includes:

- Collection from site
- Strip and Report
- Testing
- Delivery back to site
- 12-month warranty on all replaced parts.

Service Contract

We have 3 levels of contract designed to suit the individual needs of our customers:

Bronze	1 Site inspection + 4 standard Strip & Inspection Reports.
Silver	1 Site inspection + 1 Repair + 6 Strip & Inspection Reports.
Gold	2 Site inspections + 2 Repairs + 8 Strip & Inspection Reports.

“Unrivalled Rapid Response service to ensure minimum disruption and downtime.”

Gearbox Service

Service Exchange

This programme is ideal where there is an installed base of identical units. We will supply a unit to replace an existing unit, which is then reconditioned and held in stock until required. The process can then be repeated.

Drop-in Replacements

Using Renold's extensive design capability we can replicate the external dimensions of an obsolete gear unit.

Commissioning & Installation

Renold can provide on-site support with commissioning and installation, ensuring customer confidence that the drive has been signed off by the manufacturer prior to entering service.

Condition Monitoring

Renold can monitor the temperature, vibration and oil in your gearbox and therefore report on the real time condition of your gearbox.

Lunch & Learn

Renold Gears provides in-house 'Lunch & Learn' sessions for our customers' maintenance personnel. Using our facilities, you can hold your own internal meeting in one of our well-equipped rooms. This is followed by the opportunity to have lunch with us and take part in an 'ask the expert' session. Finally, you will take a facility tour where you will learn about maintaining and servicing your on-site gearboxes.

**"Over 135 years of
gearbox design
and manufacture."**

Key Industry Sectors

Renold products and services are utilised in a wide range of applications highlighted in the key industry sector brochures, available to download from www.renold.com

Agriculture, Forestry & Fishing

Construction Machinery

Energy

Environmental

Food & Drink Processing

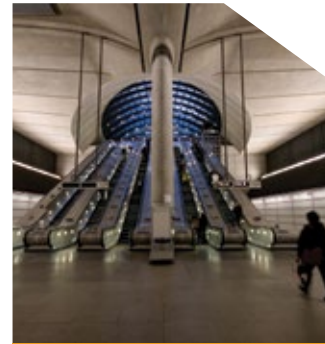

Manufactured Products

Material Handling

Mining & Quarrying

Transportation
